LANGUES

ENLISH	Professional
FRENCH	Bilingual
ARABIC	Native

SOFTWARE

- **R / RStudio** programming
- Joinpoint Regression Program
- Zotero
- Microsoft Office

SKILLS

TECHNICAL SKILLS

- Critical appraisal of scientific literature
- Statistical Analysis Plan (SAP)
- Statistical modeling
- Sample size calculation
- Results reporting using TLFs
- Scientific Article drafting (IMRaD format)

CLINICAL RESEARCH REGULATIONS

- Jardé Law (RIPH)
- Jardé Law (RNIPH)
- Good Clinical Practice (ICH GCP E6)

SOFT SKILLS

- Teamwork
- Methodological rigor
- Adaptability

WORK EXPERIENCE

April-September 2026 | Biostatistician Methodologist
Île-de-France Regional Health Observatory

- Analysed trends in 7 mortality indicators across 10 geographical areas: Île-de-France, its 8 departments, and Metropolitan France, from 2012 to 2024.
- Conducted a literature review and identified more than 100 relevant references.
- Identified data sources and developed the statistical analysis plan.
- Processed SNDS and INSEE data to calculate indicator rates.
- Analysed time trends using R and the Joinpoint Regression Program, including Joinpoint regression, the Mann-Kendall test, and ARIMA models.
- Interpreted results and produced more than 70 figures and 10 summary tables.
- Authored a scientific article in full (Introduction, Methods, Results, and Discussion) and a report to communicate the study findings.

2019–2024 | Hospital Rotations across Multiple Departments
University Hospital Centres (CHU) and Hospital Establishments (EHU), Oran, Algeria

Developed an understanding of **diseases**, **medications**, and clinical **protocols**, supporting collaboration between medical and statistical professionals and the communication of scientific findings to healthcare professionals without statistical training, in the context of **clinical trials** and **Real-World Evidence** studies.

PROJECTS

Analysis reports available in my portfolio:
tinyurl.com/portfolio-biostat

- Efficacy of adjuvant chemotherapy in colon cancer: Phase III randomized clinical trial
- Prognostic factors of melanoma-specific mortality
- Evaluation of FEV$_1$ changes and treatment efficacy in patients with COPD
- Impact of right heart catheterization on 30-day mortality in critically ill patients

EDUCATION

Master's Degree (M2) in Methodology and Statistics in Biomedical Research
Faculty of Medicine, Université Paris-Saclay

Master's Degree (M1) in Public Health
Faculty of Medicine, Université Paris-Saclay

Doctor of Medicine (MD)
Faculty of Medicine, University of Oran 1
